B<sub>12</sub>-2000™ Lozenges

with Folate Acid and B<sub>6</sub>

Vitamin B<sub>12</sub>, an essential vitamin, is an indispensable coenzyme for two very important enzymes having key roles in internal metabolism. The first enzyme ring, methylmalonyl-CoA mutase, is involved in fatty acid metabolism, and the second, methionine synthase is involved in nucleic acid synthesis and methylation reactions.

Folate, like B<sub>12</sub>, is required for DNA synthesis. Folate is an integral participant in protein synthesis as well as lipid metabolism.

Vitamin B<sub>6</sub> is vital to numerous functions. These functions include immune support, gluconeogenesis, red cell metabolism, as well as lipid and neurotransmitter synthesis, which affects the nervous system and hormone function.

Oral Contraceptive – Drug/Nutrient Interactions

The use of oral contraceptives are associated with decreased folate, vitamin B<sub>12</sub> and vitamin B<sub>6</sub> levels. Among the areas of concern are the increased plasma homocysteine concentration (which impacts cardiac health), and in the case of pregnancy after cessation of oral contraceptive use, the increased risk of neural tube defects resulting from folate depletion.

Nutritional Status and Age-related hearing loss in Elderly Women

Concern over B<sub>12</sub> and folate status is not limited to women of child bearing age. Poor vitamin B<sub>12</sub> and folate status may be associated with age-related auditory function. Two of the most common vitamin inadequacies in the elderly are vitamin B<sub>12</sub> and folate.

Product Information

Each bottle of B<sub>12</sub>-2000™ Lozenges provides a full 60 days of nutritional support to help maintain adequate vitamin B<sub>12</sub>, folate and B<sub>6</sub> levels. Supplied as a great tasting lozenge, B<sub>12</sub>-2000™ Lozenges allows for sublingual uptake of B<sub>12</sub> which has been demonstrated to be an effective means of delivery of this important nutrient.

Supplement Facts

De-Stress™ from Biotics Research Corporation supplies an all natural, bio-active peptide having anxiolytic activity. In other words, De-Stress™ can be used to reduce stress and anxiety!

Double blind human studies measured physical and psychological responses to stress. Included were measurements of cortisol and ACTH levels, as well as systolic blood pressure. In all cases, De-Stress™ fared well against controls in response to stress.

In an animal model using a Global Anxiety Score, the active component in De-Stress™ had a significantly lower score than the control group, the St. John's group and the Kava-Kava group (44.9 vs. 67.4, 66.8 and 68.2 respectively).

The feedback from physicians and other Healthcare Professionals has been tremendous. De-Stress™ is a success! De-Stress™ has been shown to be effective at reducing stress and anxiety within 24 - 48 hours, often with the first dose!

De-Stress™
